

Congratulations! If you can read this, then your web browser had the Adobe Reader already installed.

Some web browsers allow you to either open or save a PDF file, while others immediately open it. The Adobe Reader toolbar also allows you to save the file. It is recommended that you save these e-books and special reports in a place on your computer where you can access them easily at your convenience. That way, you can either print out the entire document, or read them offline.

Click the back button on your browser to go back to “E-Books and Special Reports.”
